

DX - SLS Sodium Lignosulfonate

Description DX-SLS is a chrome free Sodium Lignosulfonate. This product has been successfully used as an excellent dispersing agent, clay inhibitor and filtration reducer in water based drilling fluid systems. It was developed as an environmentally friendly product, produced by sulfonation of softwood lignin.

Typical Properties	Appearance	Light tan to brown flowable powder
	Moisture	8% max
	PH (10% solution)	6.5 – 8.5
	Water Solubility	99% Min
	Specific Gravity (Water=1)	Approx. 0.5

Use Recommendation

The specific dosage for each system depends upon the current conditions. It is recommended to run laboratory tests to determine the specific dosage.

Packaging DX-SLS is available in 50 pound, multi-walled, moisture proof paper bags.
